

# Crimestoppers API

The background of the entire page is a close-up, slightly blurred photograph of a person's hand typing on a laptop keyboard. Overlaid on this image are several semi-transparent white icons: a large padlock in the upper center, a server rack in the top right corner, a person icon, a cloud, and an envelope icon. These icons are connected by thin white lines, suggesting a network or data flow.

Facilitating seamless and secure data exchanges for our partners.

**Streamline your intelligence exchange  
with our API:**

# Streamlining our connection with partners.

## We're building efficiencies in our data exchange.

### What is an API?

Application Programming Interface is a software connection that allows two applications to talk to each other seamlessly.

### Why is the Crimestoppers API important?

The API enables our partners to establish a secure and efficient channel with Crimestoppers to enable critical data exchange.

Launched in September 2023, this advanced solution has been meticulously developed to assist our partners in managing the transfer of substantial and complex data with efficiency and security.

### Benefits of our API:

- Streamlines secure information sharing from Crimestoppers
- Allows direct and customisable report access
- Ensures data security with stringent user and application authentication
- Reduces time and errors by eliminating double keying
- Freeing up vital resources and time that can be redeployed to other vital aspects of the business
- Offers flexible data delivery options, either on-demand or scheduled
- Easily scalable to accommodate increasing data needs without system upgrades

### Elevate your data processing efficiency

Enquire with us today to explore Crimestoppers API as a solution for your organisation:

# Crimestoppers API

## A partner centric approach

Crimestoppers API is designed to cater to partners' needs, facilitating secure, tailored access to reports on demand.

- Secure access to disseminated reports from Crimestoppers to partners, enabling data auto-ingest into any preferred platform.
- Enables outcomes to be securely shared with Crimestoppers.
- Authentication is achieved using API keys, unique to each partner organisation.
- Bespoke request rate available, enabling partner organisations to make up to 60 requests per 1 minute window.
- Duration of report access can be configured to suit organisation's needs and data retention policies.
